

Direct Express

Fast forward solutions »

Introducing Direct Express from TNT

DIRECT: Shipments bypass depots and hubs, feeding directly into our domestic networks.

EXPRESS: A fast, flexible and reliable door to door delivery solution.

TNT Direct Express is a new solution developed specifically for customers with high volumes within Europe. It responds to changing market requirements and customer demand for a solution which optimises their supply chains through shorter transit times, high reliability and cost effectiveness.

How it works

1. Items are labelled at customers' premises to end destination and prepared for collection.
2. Collection bypasses depots on a dedicated route, to connect directly to TNT's domestic hub in the destination country.
3. Our domestic transport system delivers each item door to door, on time and in perfect condition.

Fast and Reliable

Simplified steps result in fast and reliable transit times

We offer you a solution connecting your goods directly to our domestic networks for last mile delivery. This direct solution allows more flexible cut off times than standard network services as well as extensive time-definite morning delivery coverage. Due to the speed and reliability of the solution, customers can also make the switch from current air services and save cost without sacrificing service quality.

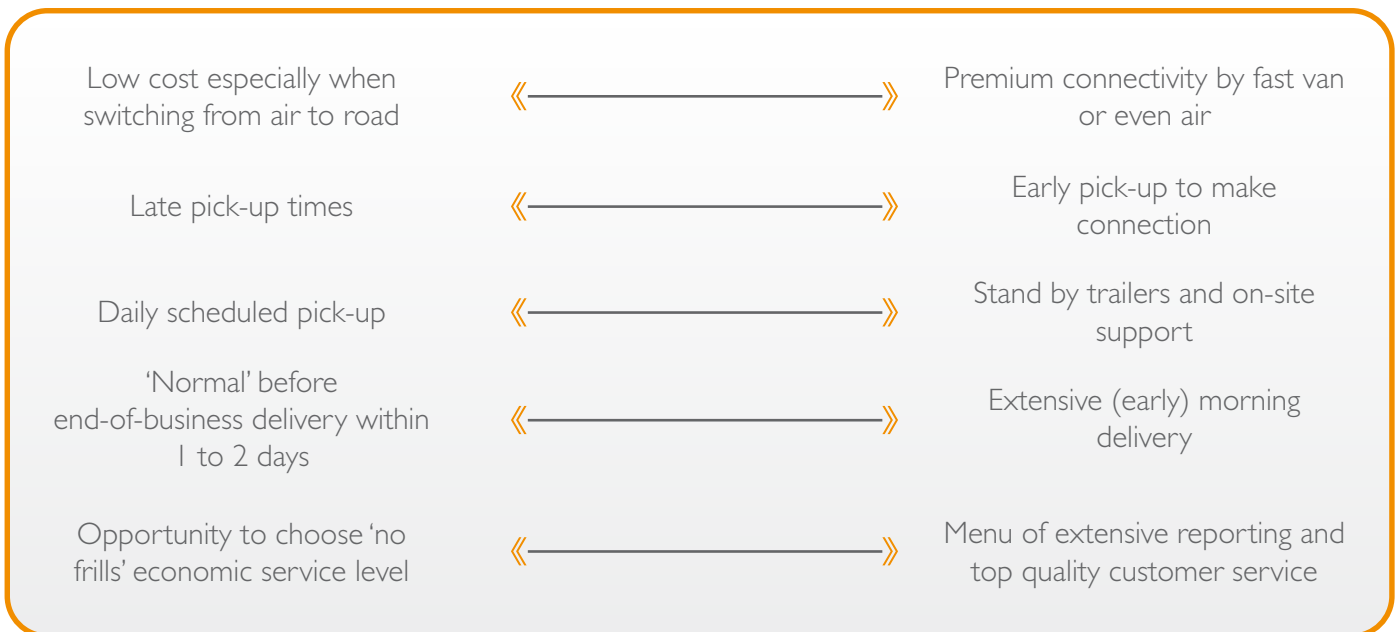

Our Direct Express service provides solutions for customers with time-definite requirements, such as:

- Hospitals
- Automotive dealers
- Field service engineers
- High Street fashion shops

These and other industries can benefit from our range of morning delivery services through Direct Express. However, Direct Express can also provide very efficient solutions by collecting early enabling connections that would otherwise not be achievable by truck.

Flexible

TNT Direct Express offers a range of options, enabling you to create the best possible solution for your budget and requirements.

An efficient route is a direct route

Minimise Touch Points

- Touch points reduced as shipments bypass depots and hubs
- Highly reliable shipping solution

Increase Sales

- Late cut off times allow more time to process customer orders and generate sales
- High service quality with simplified process increases customer satisfaction

Reduce Costs

- Competitively priced
- Reduce warehousing costs
- Improve cash flow management
- Inventory management is improved, reducing carrying costs

Improved Control

- End-to-end visibility of shipment data
- Track and trace your shipments online

TNT can provide the support you need to streamline your supply chain and quantify the benefits of Direct Express.
