

Hospital Express

Reliable, cost-effective delivery to and from every hospital in Europe

We know Europe's hospitals inside and out.

TNT's Hospital Express service visits every hospital in Europe almost every day. Our experts are familiar not only with the locations of each facility, but with their various departments, internal operations and policies.

When it comes to delivery of critical medical supplies such as high-value surgical kits, we leave nothing to chance.

We provide tailor-made solutions that include delivery to precise locations – specific departments, operating theaters or even particular individuals – within thousands of hospitals.

And we know that getting your goods returned from the hospital is just as important as getting them there in the first place.

That's why we've developed customised returns solutions that draw on our healthcare knowledge and our familiarity with the hospitals we visit each day.

We understand that when one patient emerges from surgery and is on the road to recovery, our job isn't done. There's always another patient waiting for treatment, and that surgical kit must be returned just as quickly as it was delivered so it can be forwarded to the next person in need.

Put our global network and healthcare experience to work for you.

We're experts in express delivery and specialists in the healthcare industry. That means we combine our established networks and processes with our focused experience to tailor the best solution for you.

We leverage our global resources to help save you time and money. But more important than what you save is what you gain: peace of mind. You needn't worry that your shipment won't be delivered on time because of an airline delay or a workers' strike. With our extensive road and air networks across Europe and the rest of the world, we work around such obstacles whenever they arise.

And our proactive customer service keeps you well informed throughout the entire process.

When you use Hospital Express, you get a dedicated service team that works side-by-side with you, often on your own site. Your team provides detailed and frequent reports to let you know the exact status of your shipments.

We can do exactly what the doctor orders.

We understand that healthcare calls for specialised, sometimes one-of-a-kind solutions. That's why we're so flexible. Our bespoke solutions can meet virtually any requirement you have.

We also offer a range of proven services and packaging for special-needs deliveries.

We have systems for transporting shipments at -79.5°C , between 2° and 8°C , and at ambient temperatures, and we can manage sensitive items and Dangerous Goods. We handle a wide range of goods in accordance with IATA, ADR and IMDG regulations.

Our packaging options include:

Medpak A protects your samples in high visibility packaging during transport. Flat packed for convenience and easy assembly, Medpak A holds a specimen transport bag that complies with IATA Packing Instruction 650 for biological substances.

Medpak Thermo takes the worry out of shipping your temperature-sensitive materials, even over long distances. This complete packaging system complies with

IATA Packing Instruction 650 and Packing Instruction 904 for dry ice.

Medpak Ice provides a highly efficient and easy-to-use option, simplifying dry ice packing and document management.

Gain precise control of your in-hospital inventories.

Keeping a well-stocked inventory of your goods in hospitals may be the best way to ensure that they are on hand whenever a patient has a need. But from an inventory management perspective, in-hospital stocks are difficult to control. Hospital Express can change all that.

Because our experts visit hospitals in Europe every day, we can provide the personal, on-site service you need to achieve efficient inventory management.

We can regularly monitor stock levels and provide you with automated, online reports that give you complete visibility of your in-hospital stocks.

You gain the power to automatically dispatch replacements or collect unused products, and that helps you maintain the right levels of inventory at all times.

You know exactly when to re-order and when to invoice so you cut the risk of out-of-stock or out-of-date products. Ultimately, we help you reduce your inventory carrying costs, and that means improved cash flow and profitability.

TNT a trusted global partner.

Experience the benefits of Hospital Express.
