

## Dangerous Goods Approved Countries (excl. Class 7, Radioactive Material)

---

Changes to the previous version of this document are marked in yellow. (Previous version: September 2011)

Scope: the TNT Fixed Networks (Road & Air) including PUD and feeders.

### **DG Approved Countries**

The table in this document summarizes whether Dangerous Goods (DG) services are available on the TNT Fixed Networks (Road or Air). If there are exceptions to the general rule, these are mentioned in the last column headed “**RESTRICTIONS / NOTES**”.

Unless specified otherwise, all DG acceptable as per the “Acceptable and Prohibited DG Substances” list can be carried to, from and through the countries listed below.

Dangerous Goods shipments to **Islands** that are part of an approved country must be shipped through **Special Services**.

### **Countries that are not DG Approved**

TNT Express does not offer any DG services on the TNT Fixed Network (Road & Air) in countries that are not listed in this document. Consequently, DG to, from and through any countries that are not listed in this document must be shipped as Special Service and, in this case, DG may not be loaded on the TNT Fixed Networks (Road & Air).

### **Exceptions**

#### Radioactive Material:

Class 7, Radioactive Materials (including Excepted Packages) are forbidden for transport by Air and by Road unless specifically approved by DHO.

(For further information please read the Radioactive Material Business Approval & Implementation Procedure. This document contains a list of TNT locations that are approved to handle Radioactive Material.)

#### BB & LB and non approved countries:

The following DG can be shipped to, from and through countries that are not DG approved providing that all regulatory requirements are met:

- Ambient UN3373, Biological Substances Category B (without Dry Ice) i.e. option code BB  
(for further information please read the Guidance Document on UN3373)
- Excepted Lithium Batteries i.e. option code LB  
(for further information please read the Guidance Documents on Lithium Batteries)

#### Returning compliant DG shipments to Origin:

- Compliant DG shipments that are held within the TNT Express network (i.e. shipments that have not yet been delivered) may be ‘Returned to Origin’ using the same mode(s) of transport as originally used even if this goes against the “Restrictions” that are documented below.
- ‘Return to Origin’ may only occur if dedicated arrangements for retrieval of the relevant shipment have been agreed with and confirmed by the Country DG Manager of the Origin Country.
