

Dangerous Goods Approved Countries

Scope: the TNT Fixed Networks (Road & Air) including PUD and feeders.

DG Approved Countries

The table in this document summarizes whether Dangerous Goods (DG) services are available on the TNT Fixed Networks (Road or Air). If there are exceptions to the general rule, these are mentioned in the last column headed “RESTRICTIONS / NOTES”.

Unless specified otherwise, all DG acceptable as per the “Acceptable and Prohibited DG Substances” list can be carried to, from and through the countries listed below.

Dangerous Goods shipments to **Islands** that are part of an approved country must be shipped through **Special Services**.

Countries that are not DG Approved

TNT Express does not offer any DG services on the TNT Fixed Network (Road & Air) in countries that are not listed in this document. Consequently, DG to, from and through any countries that are not listed in this document must be shipped as Special Service and, in this case, DG may not be loaded on the TNT Fixed Networks (Road & Air).

Exceptions

The following DG can be shipped to, from and through countries that are not DG approved providing that all regulatory requirements are met:

- Ambient UN3373, Biological Substances Category B (without Dry Ice) (for further information please read the Guidance Document on UN3373)
- Excepted Lithium Batteries (for further information please read the Guidance Documents on Lithium Batteries)
