

# Value Added Service Centre

Value Added Service Centres are provided 'in transit' and offers you:

- the latest possible cut-off times in the industry
- greater flexibility
- cost reductions
- fast transit times and
- standardised global coverage.

## What value added services can we offer you?

- Merge in Transit
- Kitting
- Returns solutions, including order processing, diagnostic testing and quality control
- Pick and Pack
- Customer specific solutions

## Your benefits from the Value Added Service Center include:

- reduced cycle times through late cut-off times and a direct feed into TNT's European Road and Air networks
- full supply chain visibility
- easy access to the EU market for automotive customers based outside Europe

- central customs clearance for the EU
- secure storage and distribution through TAPA-certified locations for temporary storage, depots and hubs
- 24/7 availability
- flexible distribution systems (Express/Economy/Special) allowing for the most cost effective distribution solution
- reduction of inventory levels and inventory pipeline costs by centralising inventory and moving high value inventory out of the pipeline
- reduction of transportation and warehousing costs
