

Packaging Solutions

temperature controlled

TNT provides you with validated packaging solutions for temperature controlled transport, worldwide.

Around the world we have local fulfilment centres to support your specific needs. We have solutions designed for transport at -79.5°C , between 2°C and 8°C , or at ambient temperatures, as well as calibrated temperature-logging systems.

Special packaging and labelling is designed to ensure your shipment arrives in perfect condition.

Find out more about...

Medpak AI, our packaging solution for ambient diagnostic specimens.

Medpak Thermo2, specialised packaging for highly temperature-sensitive shipments.

JIT dry ice solution3, our just-in-time dry ice service.

JIT packaging solutions4, the specialised packaging you need, leased when and where you need it.
