Press Release

TNT offers CO2 neutral domestic express delivery in Germany at no additional charge

Publish Date : 14 January 2015 08:30 CET -

Amsterdam, The Netherlands | Troisdorf, Germany

TNT is now offering CO₂ neutral delivery of all express domestic consignments in Germany at no additional charge. The initiative will help SMEs and large customers alike mitigate their environmental impact.

CO₂ neutral shipping works in two steps: TNT first measures how much CO₂ emissions are produced when transporting its customers' consignments, then neutralises these emissions with an equivalent amount of CO₂ credits. TNT exclusively uses CO₂ credits from renewable energy projects that meet Gold Standard requirements. An external auditor (SGS) verifies the process. TNT's CO₂ calculation methodology fully complies with the European Norm EN16258.

Customers can also opt for CO₂ Neutral for their international consignments. By doing so, they will receive a yearly certificate specifying the amount of CO₂ that TNT has neutralised on their behalf. TNT's European Road Network provides businesses with services to help drive down CO₂ emissions directly when compared to air transportation.

CO₂ Neutral shipping is part of TNT's renewed range of CO₂ services, which also includes tools to measure historic emissions and model future ones. These services equip customers with knowledge and allow them to take action. They are designed to meet the needs of both large companies with comprehensive carbon reduction programmes and SMEs that rely on practical third-party tools.

In the coming months TNT will roll out its upgraded CO₂ services in other large
