TNT Electronic Services

ExpressConnect

Build TNT's shipping tools into your company systems

It's our business to deliver yours

Your business.

Seamlessly combine your business with our global network to create a
tailored shipping solution that you control. It's a streamlined, cost-effective,
way of transforming the distribution experience for you and your customers.

Real time interaction

ExpressConnect gives you and your customers real time
interaction with TNT's services. When using your website,
customers can receive your price quote merged with TNT's
shipping and handling costs. They can even choose between
TNT's range of delivery services. TNT will then be directly
notified of the shipping request, significantly streamlining the
e-commerce process. You and your customers can then track
the shipment status from pick-up to delivery – all online.

ExpressConnect will also simplify your shipping tasks.
For instance, it allows you to print shipping documentation –
including labels, manifests and commercial invoices – directly
with your own information.

A vital part of your company

ExpressConnect is a flexible solution that enables you to
connect your business processes with TNT's services through
XML technology. In this way, ExpressConnect becomes
integral to your business:

> Your website or ERP system will be in control
> It supports an interactive, dynamic business process

Our network

> Personalised rates are available in real-time
> Status information is available for you and your clients

You will save time and money, improve visibility and improve service levels to customers and suppliers.

Adding all round value

Although ExpressConnect primarily supports distribution processes, it can also be applied to other areas such as:

> Transportation
> Sales
> Finance and administration
> Operations and customer service

Thus ExpressConnect adds significant value to the continuous improvement of your business by helping you to maximise efficiency, minimise costs, and increase visibility and control.

Unique and versatile

ExpressConnect allows you to select shipping services that meet your requirements and integrate them into your company systems. The core services are Pricing, Tracking, and Shipping

Management, all of which can be adapted to suit your precise needs. We will then work with you to find the optimum solution and provide you with support throughout the implementation process.

Once installed, this collaborative solution can be applied to numerous activities including telesales activities, internet sales, order fulfilment, and returns management.

Whatever your business

ExpressConnect is an ideal solution for companies who ship or distribute many items. It can also be tailored to meet the specific needs of mid-sized companies with local offices, suppliers and customers.
