

TNT Electronic Services

ExpressShipper

Daily shipping operations made easy

It's our business to deliver yours

Save time.

Keep on top of busy shipping schedules with a time-saving PC-based shipping program. It makes shipping easy and cost-effective.

A shipping HQ from your own PC

ExpressShipper is designed to meet the needs of companies with medium level volumes of shipments. As such, it acts as your personalised control centre – a sophisticated tool that gives you transparent, up-to-the-minute pricing, ordering, tracking and collection information.

It can operate on stand-alone or network systems, and the software can be downloaded or installed via a CD-ROM. At its heart is a Shipping Manager function with all relevant tasks displayed on a single-screen, making it easy to manage your shipping from beginning to end.

Creating a shipment

You can create your own address book or import addresses from other sources, you can also:

- > look up your own rates based on the TNT service you have requested
- > transmit shipment details to TNT and request collection of your consignment

TNT will then confirm your collection request immediately – on-screen and by email. The confirmation will also be stored in Shipping Manager. Meanwhile, you can:

- > configure and print labels on your own printer
- > fill in the information necessary for customs clearance and export declarations if required

Completely in control

You can create a daily overview by using our advanced tracking functionality. At a glance, you immediately know which shipments are pending, shipped, in-transit, delivered or have exceptions.

You can also:

- > email an Advanced Shipping Notification to all interested parties so that they know when to expect delivery
- > create and print all shipping documentation
- > transmit shipping data to TNT via a secure internet connection

Multilingual

ExpressShipper gives you a choice of over 40 languages that can be set upon installation.
