CONSIGNMENT NOTES

Consignment notes help to ensure your shipment is delivered at the right place as quickly as possible. When you’re sending a shipment, you’ll need to create a consignment note. It contains all the details about your shipment and accompanies the shipment throughout its journey. The easiest way to prepare your consignment note is to use one of our online shipping tools. When you have entered all details, the online tool will generate a consignment note which you can then print. If you would prefer not to use our online tools, you can manually complete a consignment note for your shipment. The example consignment note below shows you the details you will need to complete.

CONSIGNMENT NUMBER

Every TNT shipment is assigned a unique consignment number. It appears underneath the barcode of the consignment note. You can use these letters and numbers to track the status of your shipment through one of our tracking tools.

COMMERCIAL INVOICES

Customs authorities require an invoice for all international shipments. A commercial invoice is used when goods are part of a commercial transaction or intended for sale. A pro-forma invoice is for goods with no commercial value. We advise customers to use their own invoices; the example below shows the information that should be included. To make things even easier, you can use our online tools, visit www.tnt.lu or see page 26 for more information.

HELP US DELIVER IN PERFECT CONDITION

MAKE SURE YOUR SHIPMENT IS FIT TO TRAVEL

We rely on customers to pack their shipments well, so we can deliver them in perfect condition.

Follow these simple tips to ensure your shipment will be delivered to your customer just as you want it to.

PREPARE YOUR SHIPMENT IN 5 EASY STEPS

BOXES

CHOOSE QUALITY
Used boxes lose strength. Ensure your box is rigid and in good condition.

AVOID EMPTY SPACE
Too much padding reduces stacking strength. Avoid boxes that are too big for your contents and require excessive padding. They risk getting crushed.

HEAVY BOXES
We can accept boxes up to 70kg without a pallet, but please put a “HEAVY” label on boxes over 23kg.

SEAL WITH A H
Use proper sealing tape in an H pattern on top and bottom, and consider strapping heavier boxes.

LABEL CLEARLY
Remove old labels. A x new labels on top, so the barcode is flat (not folded over the edge).

STACK IN COLUMNS
Columns ensure maximum stacking strength. If the contents are rigid, you can use ‘bricklayer style’ for increased stability.

DO NOT OVERHANG
Items should fit squarely on the pallet, without hanging over the edge. We can’t accept overhanging pallets.

KEEP IT FLAT
A level top surface makes it strong, compact and stackable. Non-stackable pallets will incur a surcharge.

STRAP IT OR WRAP IT
Use strapping and/or stretch wrapping to hold items in place on the pallet. Wrapping should include the pallet itself.

LABEL CLEARLY
Pallets are stacked for transport, so labels need to be fixed to the side, not the top.

For packaging tips and advice: www.tnt.lu.

BOXXES

UNATTACHED ITEMS
Everything must be attached to the pallet with strapping and/or wrapping to form a single, inseparable unit.

LOW-QUALITY PALLETS
No poor-quality or damaged pallets.

OVERHANGING PALLETS
Items must not exceed the dimensions of the pallet.

STRAP IT OR WRAP IT
Use strapping and/or stretch wrapping to hold items in place on the pallet. Wrapping should include the pallet itself.

UNBOXED ITEMS
No exposed sharp items. Ample padding is required to prevent injury.

SHARP EDGES
Items that overhang or stick out could cause injury or damage other shipments.

PALLETS

AVOID THESE PACKAGING PITFALLS

Imperfect packaging can put your goods, other shipments, and our TNT team members at risk. Before accepting any shipment, our driver will verify that it is “fit for travel.”

UNATTACHED ITEMS
Everything must be attached to the pallet with strapping and/or wrapping to form a single, inseparable unit.

LOW-QUALITY PALLETS
No poor-quality or damaged pallets.

OVERHANGING PALLETS
Items must not exceed the dimensions of the pallet.

STRAP IT OR WRAP IT

UNBOXED ITEMS
No exposed sharp items. Ample padding is required to prevent injury.

SHARP EDGES
Items that overhang or stick out could cause injury or damage other shipments.
HOW TO CALCULATE WEIGHT BY VOLUME?

The tariff for large but light consignments is calculated on the basis of weight by volume, i.e. according to the space the consignment takes up, instead of the actual weight. This is a standard IATA calculation method.

To calculate the weight by volume of your consignment, multiply the length with the width and the height of your consignment and multiply this result with the corresponding conversion factor of the table below. By way of example, the weight by volume of a box and of a cylinder are calculated below.

- Volumetric weight: 22kg

**Cylinder**
- Diameter: 0.3m
- Height: 0.4m
- Conversion factor: 0.036
- Volumetric weight: 7.5kg

**Service**

**Conversion Factor**
- **Express Services**
  - Multiply by 200
  - Length (m) x Width (m) x Height (m) x 200
- **Economy Services (Intra-Europe)**
  - Multiply by 250
  - Length (m) x Width (m) x Height (m) x 250
- **Economy Services (Rest of World)**
  - Multiply by 200
  - Length (m) x Width (m) x Height (m) x 200

**Size and Weight Restrictions**

The maximum weight and dimensions may vary depending on the country of collection and the destination. The table below indicates our standard dimensions, weight and volumes.

For shipments from Europe to 145 destinations, the weight is limited to 30 kg per parcel and 500 kg per shipment, and its dimensions should not exceed 1.0 x 0.6 x 0.7 m.

Contact Customer Care to know the correct limits for your destinations.
